<b>Product Description:</b>	The Z Dinner Party Hedge Fund is a secured investment, listed on the JaZoN Ex., that combines the social exchanges created during a dinner party good, bad, and ugly. It is weighted towards the interactions that occur, not the physical consumption.  Value is produced by the natural desire to foster, maintain, and spawn social interactions with other people. The fund also features a secondary value motor by way of the possibility of getting free food. Price volatility depends on the availability, willingness, and hospitality of the JaZoN Ex. social assets. Liquidity can vary according to mood, workload and current financial conditions.
<b>Investment Purpose:</b>	The stocks featured in the Z Dinner Party Hedge Fund are designed to ensure continual value creation based on natural social behavior, and feature a hedge to provide added stability when non-desirable social obligations occur.  The Fund features seasonal adjusted cycles with a stable long term growth.
<b>Clearing:</b>	Z Exchanges & Zederal Reserve
<b>Secondary market:</b>	Collectors of Art and valuable objects.
<b>Listing:</b>	Z Exchanges & JaZoN Ex., JZX^
